

Methods

The Biodiversity Protocol of “The AEI Regenerative Standard”

Additionality

The protocol incentivizes outcomes that would not have occurred without the implementation of the project.

The protocol facilitates procedures, measurements, and results that are public and auditable.

The protocol prioritizes land steward engagement, local & equitable benefits, and safeguards to prevent adverse social impacts.

Defensibility

The protocol is based on rigorous scientific research and extensive experience in the field.

Scalability

Implementation of the protocol is cost effective and scalable across geographies and ecoregions.

Thanks and Acknowledgements

The team acknowledges and appreciates the guidance and support of these individuals:

Mr. Steve Apfelbaum – Your wealth of knowledge, devotion to rigor, and depth of curiosity and creativity are an inspiration, and the life blood of this project.

Mr. Jason Carlson – Your technical acumen and expertise in rapidly evaluating proposed solutions, identifying datasets and creating high resolution prototypes brought this project to life.

Ms. Sara Clow – Your strategic, operational, and contextual inputs were always insightful and critically valuable in keeping the project focused and always moving forward.

Dr. Damien Thompson – Your guidance and support was critical in ensuring that we challenged our own assumptions and made sure to ask the right questions at the right time.
